Pre-Screening Guidelines

To ensure a smooth and accurate health screening experience, please take note of the following guidelines:

To ensure a seamless start to your health screening, we kindly request that you arrive 10 to 15 minutes prior to your scheduled appointment time. This will allow sufficient time for registration procedures and to settle in comfortably before your screening begins.

Required Items:

- Identification Document: Please bring your original identification card or passport for verification during registration.
- If you are part of a partnered corporation, please also bring any relevant supporting documents for proof.

Rescheduling Due to Illness:

- If you are feeling unwell, we strongly advise postponing your health screening to ensure the accuracy of your results. Kindly contact us to reschedule your appointment at your earliest convenience.

Preparation Guidelines:

- Fasting Requirement: A mandatory fasting period of at least 8 to 10 hours is required prior to your appointment, particularly for tests involving glucose or triglyceride measurements. Consumption of plain water is permitted and encouraged during the fasting period.
- Screening Duration: The comprehensive health screening process, including the full body check-up and medical consultation, is estimated to take approximately 2.5 hours per individual.

Medication Instructions:

- Diabetic Medication: Please refrain from taking your prescribed diabetic medication on the morning of your scheduled appointment. You may resume your medication after the completion of all screening tests.
- Hypertension and Cardiac Medication: Regular high blood pressure and heart medications should be taken as usual unless otherwise instructed by your physician.

Hydration and Ultrasound Preparation:

- For pelvic ultrasound scans, please ensure you drink 5 to 6 glasses of water prior to your appointment.
- For abdominal ultrasound scans, fasting is required.

Vision Correction:

- If you wear spectacles, please bring them for your vision tests.
- We kindly request that you avoid wearing contact lenses on the day of your appointment.

Treadmill Stress ECG:

- If your screening includes a Treadmill Stress ECG, please bring your running shoes and comfortable sports attire.

Specimen Collection:

- Urine and stool specimen bottles will be provided to you on the day of your screening.

For Female Participants:

- To ensure accurate test results, particularly for Pap smears, CA125 tumor marker tests, and urine and stool analysis, we recommend scheduling your screening at least 5 to 7 days after the last day of your menstrual period and at least 5 days before your expected next menses.

Report Delivery:

- You will receive your comprehensive medical report through the email address provided at registration within two (2) weeks from your screening appointment. For your security, this report will be encrypted with a password.

We appreciate your cooperation in adhering to these guidelines. Should you have any questions or require further clarification, please do not hesitate to contact us.

Terms and Conditions for Health Screening Services

These terms and conditions govern the health screening services provided by HealthConnexion Pte Ltd. By proceeding with your booking, you acknowledge and agree to the following:

Medical Advice and Additional Tests:

- Medical advice and recommendations will be provided based on a comprehensive assessment of your individual case findings, clinical investigations, medical history, and personal profile.
- In accordance with the health screening guidelines established by the Singapore Academy of Medicine, our medical professionals may, based on their clinical judgment during your screening, recommend additional tests deemed necessary for a thorough evaluation of your health.

Optional Add-On Services and Packages:

- To enhance your health screening experience, we offer a selection of optional add-on services and comprehensive packages at an additional cost. Details of these options and their associated fees can be discussed with our team during the booking process or at the time of your consultation.

Appointment Booking and Changes:

- Prior appointment booking is essential and is subject to availability.
- Any requests to change the date or time of your scheduled appointment must be made at least two working days in advance. We will do our best to accommodate your request, subject to availability.

Package Inclusions and Limitations:

- All components included within our health screening packages are strictly non-transferable to another individual, non-exchangeable for other services, non-refundable, and not redeemable for cash.
- Any service or item within a purchased package that is not utilized will be forfeited.

Pre-paid Packages:

- Pre-payment for health screening packages is non-refundable.
- Pre-paid packages must be utilized within three months from the date of purchase. Failure to complete the screening within this timeframe will result in the forfeiture of the prepaid amount.

Amendments and Modifications:

- HealthConnexion Pte Ltd reserves the right to amend these Terms and Conditions at its sole and absolute discretion without prior notice. The latest version of the Terms and Conditions will be available on our official website or upon request.
- HealthConnexion Pte Ltd further reserves the right to modify the prices and components of our health screening packages at its sole and absolute discretion without prior notice.

By proceeding with your health screening, you signify your understanding and acceptance of these Terms and Conditions. If you have any queries, please do not hesitate to contact us.

Operation Hours

Vaccination

Vaccination is a proactive way to build immunity and lessen the burden of infectious diseases. Recognizing that individual suitability varies based on age, health, and other factors, HealthConnexion encourages you to discuss your specific vaccination needs with our resident doctors. We offer a range of vaccinations, listed below.

- Respiratory Syncytial Virus (RSV)
- Human Papillomavirus (HPV)
- Measles, Mumps, Rubella
- Chickenpox (Varicella)
- Flu (Influenza)
- Pneumococcal
- Hepatitis A
- Hepatitis B
- Twinrix (Hepatitis A and Hepatitis B)
- Shingles
- Boostrix

Multi-Cancer Early Detection

Blood tests offer a less invasive approach to potentially detect cancers at an earlier, more treatable stages. Innovative technologies are expanding the scope of blood-based screening. Discuss with our doctor if this evolving method is suitable for your individual health needs and risk factors .
